

Safe Use and Best Practice

Before use

1 Decide on what and how you want to lift your load.

2 Check the identification label (WLL) relative to the position of lifting.

3 Defective slings must be destroyed immediately.

4 Only use slings which have been correctly identified and certified.

During the use of the sling

5 Protect any sharp edges on the load to avoid damaging the sling.

6 Do not twist or put knots in the sling.

7 Do not drag the sling along the floor.

8 Ensure the load is always level and balanced.

9 Lay the slings down so there is no possible friction.

After use

12 Store slings in a dry, clean and well ventilated area. Do not store: on the floor, in direct sun light, under UV light, near heat sources or chemical products etc.
