Why choose EXERFLEXPRO® Fitness Cable?

For more than a decade, the world's leading fitness manufacturers have relied on EXERFLEXPRO® cable as the ONLY cable used in their equipment. Designed and manufactured in the USA, EXERFLEXPRO® builds on Loos & Company's tradition of providing fitness equipment OEMs, equipment owners, and equipment repair professionals the highest level of cable performance and safety on the market.

It enhances user experience.

Equipment owners will see an immediate return after installing EXERFLEXPRO®. Cable smoothness and flexibility will provide their customers a top quality exercise experience.

It provides unmatched safety.

Each lot of EXERFLEXPRO® fitness cable by Loos & Co., INC. is tested and certified – reducing failures under strain and lessening the risk of injury.

It reduces cost of ownership.

Equipment owners will require fewer service calls and less downtime for their equipment. Repair professionals can eliminate the need for multiple service calls to replace inferior cables.

It ensures a long cycle life.

Manufacturers and owners rely on EXERFLEXPRO® for an extended service life in their equipment. Strict quality standards and extensive testing procedures ensure that cable meets the strength and endurance required on today's high performance fitness equipment. And we don't just say it, we certify it in writing.

Always available from stock.

Need a pulley or a sheave?

Regardless of what your industry calls it, it's a wheel with a groove that is designed to support movement and change the direction of force in a wire rope or belt. Pair our wide range of pulleys and sheaves with our cable to get the performance you need, when you need it.

Completing your project.

Cable fittings from our Cableware® Division are the industry standard for completing your exercise assembly. They offer a full range of sizes for every application, as well as all the necessary equipment for proper installation.

Why Loos & Company?

Founded in 1958, Loos & Company has evolved from a three-car garage based family start-up, to a 220,000 square foot facility located in Pomfret, CT. Loos is a multi-divisional company capable of drawing wire from rod, stranding cable, and building cable assemblies to your specs. Our wire rope division operates 24 hours a day, and produces over 1 BILLION feet of strand per year. Our work in aviation grade control cable quickly led us to become the leader in the fitness industry - where quality and performance excellence are just as vital.
