To all TECNI® Customers

Conflict Minerals Compliance Statement

Under the definition of “DRC Conflict-Free,” products supplied to TECNI Ltd:

1. Do not contain tantalum, tin, tungsten or gold (3TG) as elements necessary to their production or functionality, or,
- 2 In order to conform with Section 1502 of the Dodd Frank Act, TECNI Ltd perform a yearly Reasonable Country of Origin Inquiry (RCOI) on the sources of 3TG (Tantalum, Tin, Tungsten and Gold) in their products and conduct due diligence with our suppliers on these metals to ensure no materials are sourced from the DRC and surrounding regions.

Should any parts or materials sourced by TECNI Ltd contain these minerals, the minerals must originate outside the DRC, come from scrap or recycled sources, or be supplied from smelters that have been validated by an independent private sector party to be conflict-free. Certified conflict-free smelters are validated as compliant to the EICC (Electronic Industry Citizenship Coalition) conflict free smelter (CFS) protocol using the CFS Compliant Smelter List. Through the CFS protocol, smelters are audited globally; the list of compliant smelters and refiners is posted at www.conflictreesmelter.org.

TECNI Ltd will continue to survey direct suppliers as a part of our conflict minerals due diligence program.

For TECNI® Ltd
